## PC Security Board

*Protect your data from intruders with the versatile and economical PC Security Board.*

The PC Security Board won't affect your PC's data or performance.

### Key Features

- ▶ *On-Line Lock-Up eliminates the need to shut down the system every time you leave your PC.*
- ▶ *Stops intruders before they can boot up.*

### Technically Speaking

The PC Security Board is a security system that doesn't depend on software. It offers several ways to keep intruders from entering and corrupting your data files. The system is easy to install; no data encryption is necessary.

Once installed, the system provides you with both boot-up and on-line security.

You can keep a record of unauthorized entry attempts and assign individual passwords for each user.

The Bus Interrupt feature automatically takes you to the security system before boot up. Only authorized users can with assigned passwords can access the system.

### For these and other components...

*Call our expert Technical Support Staff for all your LAN needs. They'll help you find the best equipment for your application.*
